

Mark Merriman has been an Industry leader for over 30 years in recruiting for the Energy Industry, primarily Electric and Gas Utilities, along with Consulting/Engineering firms and related organizations. Since 1982 Mark has been the Owner & General Manager of

Management Recruiters of Colorado Springs. In his role of “player/coach” he has trained, mentored and assisted all of his Account Executives in their assignments while continuing to work his own recruiting specialty in the Power Industry. Mark has earned a reputation with his clients as a “go-to guy” for the hard-to-find talent in the critical field of today’s Energy Industry.

Mark has always been committed to this statement: “My goal with candidates is to treat them with the same respect and professionalism whether I have contacted them during a search or they have sought my assistance in reaching their career goals.” When working with my client companies, I strive to develop a partnership with them. Only by working toward an agreed upon goal, can I identify the candidate that is a match for both the technical as well as the cultural requirements of the position. In today’s rapidly changing energy field, my clients are seeking individuals that have a track record of success as well as a vision of the industry’s exciting future. Emerging issues such as Climate Change Legislation, Environmental Regulations, Expansion of Power Transmission Capabilities, Renewable Energy, Smart Grid Technologies and Demand Response are driving the demand for industry talent. Senior Management, Finance and Accounting, Operations, Environmental Health and Safety, Project Management, and Engineering are the areas that I work in most frequently.”

Mark welcomes contact from any industry-experienced candidates that are committed to enhancing their careers in the Energy field. If you are a Hiring Manager who is seeking top talent for your organization call Mark Merriman at 719-575-0500 to discuss your requirements.

Mark S. Merriman, Manager
